Objectives

The main task was:

Designing and testing an empowerment curriculum dealing with learning in later life

The subtasks were:

Establishing regional focus groups of older people
developing a set of methods with useful strategies and tools for learning in later life

NEGOTIATION and PROZESS learning

Negotiation has given partners the opportunity to share beliefs and principles drawn from national activities about learning and older people. From these it has been possible to identify things we have in common and national variations; things we have never tried but might be able to within national constraints; things that need further consideration and lobbying for at national, regional and local level.
